

SAP – WM COURSE CONTENT

- Overview of ERP
- SAP Hierarchy Structure
- Introduction to Warehouse Management
- Warehouse management overview in SAP R/3
- Organization Data
- Warehouse Structure
- Warehouse Master Data
- WM Material master view
- Organization Data
- Define Warehouse structure
- Warehouse number
- Storage type
- Storage section
- Storage Bin
- Picking Area
- Storage unit
- Quant etc..
- Master Data
- Material Master
- Storage bin
- Transfer Requirement
- Create Transfer requirement automatically
- Create Transfer requirement manually
- Create Transfer requirement for storage type
- Create Transfer requirement for material
- Posting change notice
- Create Posting change notice – PCN
- Transfer Order

- Number Range for TO
- Create TO w.r.t Transfer Requirement
- Create TO w.r.t Posting change notice no
- Create TO w.r.t Storage unit
- Create TO w.r.t Material document
- Create TO w.r.t Inbound delivery
- Confirm the Transfer Order
- Cancel the Transfer Order
- Set Up Auto T.O. Creation for TR's and PCN'S
- Put away Strategies
- Next to empty bin
- Addition to existing bin
- Bulk storage
- Fixed bin strategy
- Picking Strategies
- Shelf life expired
- FIFO
- Stringent FIFO
- LIFO
- Management Business Scenario's (MM)
- Goods Receipt processing with inbound delivery
- Goods receipt processing without inbound delivery
- Goods issue with outbound delivery
- Goods issue for internal consumption
- Stock transfer Scenarios
- Storage unit management
- * Define storage types with storage unit management
- Put away and Picking strategies with Storage
- unit management
- Create Transfer order with storage unit number
- Inventory
- Create Physical inventory record
- Enter count results

- Clear the difference in WM
- Clear the difference in IM
- movement types
- Define reference movement types for WM
- Assign reference movement types to WM movement types
- Define WM movement types
- Search Strategies
- Storage type search strategies
- Storage section search strategies
- Storage bin type search strategies
- Batch Management in WM
- Condition Tables
- Access Sequence
- Strategy Types
- WM Batch Search Procedure
- Batch Status in WM
- Characteristics and class
- SLED In Batch in WM
- Manual And Automatic Batch Display In WM
- Integration
- WM with QM
- WM with PP
- WM with SD
- Import Wizard / Report Conversation
- Using Import wizard
- Creating of BIAR
- Migrating the BO objects from one CMS to another CMS
- Migrating the objects from one domain to another (dev/stage/Prod)
- Publishing
- Publish the Webi report between different CMS
- Publish the converted reports (deski to webi) to destination servers
- Publishing the repository objects
- CMC/CCM/CMS

- Introduction of Window and web based Central management in BOXIR3
- Roles and responsibilities of Contents of CCM/CMS/CMC
- When to use CCM/CMS/CMC
- Detail description of contents of CCM/CMS/CMC
- Case study
- BO-SAP INTEGRATION
- Understanding common interfaces between BOXIR3 and SAP
- Installation and Integration methods
- Bring the SAP environment in to BOXIR3 and vice versa
- Working with SAP objects in Crystal 2008 (Info cubes/SAP Table)
- Crystal Report 2008
- Introduction to Crystal Reports
- Creating Reports
- Selecting Records
- Organizing Data on Reports
- Formatting & Section Formatting
- Creating basic and complex formulas
- Using Variables and Arrays
- Using Report Templates
- Applying Conditional Reporting
- Building parameterized and specialized reports
- Summarizing Data with Cross Tabs
- Using Report Sections
- Representing Data Visually
- Managing Reports
- Distributing Reports
- Using Repository and Repository data sources
- Report Processing
- Using sub Reports
- Using Custom Functions
- How to Publish Crystal Report in Bo-Enterprise Portal
- Scheduling
- CRYSTAL XCELSIUS

- Understanding crystal xcelsius
- Creating templates
- Building query template in xcelsius
- Creating scorecard and dashboard using xcelsius
- BO-VOYAGER
- Understanding Voyager
- Creation of personal and corporate voyager
- Publishing the voyager
- Importing cubes in voyager & Report Development
- Bo-Administration
- Computer setup
- Business Objects Enterprise Architecture
- Creating Folders, Users and groups
- Publishing and configuring the servers
- Scheduling
- Topic on Report Conversion Tools
