

ORACLE – PEOPLESOFT DATA MANAGEMENT COURSE CONTENT

- 1. Course Overview
 - Course Objectives
 - Course Agenda
- 2. Technology Overview
 - Describing Data Management Tasks
 - Describing Data Management Tools
 - Describing PeopleSoft Database Tables
 - Describing Change Assistant
 - Describing Application Updates
 - Describing Application Upgrades
- 3. Examining PeopleSoft Databases
 - Describing PeopleSoft System Components
 - Describing Structure Versus Content
 - Tracking Definition Changes
 - Describing Customizations
 - Defining Upgrade Terminology
 - Identifying a Database
- 4. Building and Altering Tables
 - Identifying PeopleTools Tables That Affect the System Catalog
 - Configuring Data Definition Language (DDL) Parameters
 - Using the Build Process
 - Altering Tables
 - Creating Views, Indexes, and Triggers
 - Running Database Integrity Reports
- 5. Identifying PeopleTools Tables
 - Examining PeopleTools Tables

- Securing PeopleTools Tables
- Running SYSAUDIT Reports
- 6. Merging Projects
 - Documenting Changes and Customizations
 - Printing Definitions
 - Searching for Strings in PeopleCode
 - Determining How Definitions Are Related
- 7. Using Change Control
 - Identifying Change Control Components
 - Administering Change Control Options
 - Setting Workstation Preferences
 - Locking and Unlocking Definitions
 - Copying Locked Definitions
- 8. Using Projects to Migrate Customizations
 - Describing the Migration Process
 - Creating Upgrade Projects
 - Copying Projects to Databases
 - Validating and Reusing Projects
 - Adjusting Definitions
 - Merging Projects
 - Copying Projects To and From Files
- 9. Using the Compare and Report Process
 - Describing the Compare Process
 - Running Compare and Report
 - Setting Upgrade Options
- 10. Viewing and Analyzing Compare Reports
 - Viewing Compare Reports
 - Analyzing Compare Reports
 - Entering Overrides in Upgrade Projects
 - Comparing and Merging Text Definitions and Files
 - Running PeopleCode Diff/Merge
 - Comparing and Merging Pages

- 11. Moving Data with Data Mover
 - Listing Data Mover Commands and Syntax
 - Exporting Data
 - Importing Data
 - Using Additional Set Commands
 - Encrypting Passwords with Data Mover
 - Renaming Records and Fields
 - Running Data Mover in Command Line Mode
- 12. Creating a Change Package
 - Describing Change Packager
 - Creating a Change Project
 - Creating File Reference Definitions
 - Creating a Change Package in Application Designer
 - Updating a Change Assistant Template
 - Finalizing a Change Package
 - Testing the Change Package
- 13. Configuring Change Assistant for Updates
 - Describing Applying Change Packages
 - Preparing the Environment
 - Setting Up the Environment Management Framework
 - Using the Environment Management Viewer
 - Setting Change Assistant Options
- 14. Applying Change Packages
 - Applying a Change Package
 - Correcting Errors in Change Assistant Job
 - Reviewing Change Assistant Logs
- 15. Comparing, Testing, and Deploying Updates
 - Describing Update Deployment
 - Reapplying Customizations
 - Migrating a Change Package
- 16. Applying Application Updates
 - Listing the Change Assistant Update Steps
 - Searching for Updates

- Downloading Change Packages
- Applying Change Packages
- Reapplying Change Packages
- 17. Planning Your PeopleSoft Application Upgrade
 - Describing PeopleSoft Upgrade Types
 - Describing Application Upgrade Process
 - Gathering Upgrade Documentation
 - Identifying Upgrade Planning Tasks
 - Describing the Software Install
 - Configuring Change Assistant for Upgrades
 - Creating an Environment
 - Creating an Upgrade Job
- 18. Preparing the Database
 - Preparing Databases for Upgrade
 - Comparing Customizations
 - Describing a Database Compare
 - Identifying Customizations
 - Preparing the Copy of Production Database
 - Preparing for the Application Upgrade
- 19. Applying PeopleTools Changes
 - Describing PeopleTools Changes
 - Explaining the Steps in a PeopleTools Upgrade
- 20. Running and Reviewing Compare Reports
 - Preparing for Application Changes
 - Running New Release Compare Reports
 - Reviewing New Release Compare Reports
 - Reviewing the Non Compare Project
- 21. Applying Application Changes
 - Customizing the New Release
 - Running New Release Upgrade Copy
 - Modifying Database Structures
 - Running Data Conversion Programs
 - Finalizing the Database Structures

- Loading Data to Complete the System Setup
- 22. Completing Database Changes and Moving to Production
 - Reapplying Customizations
 - Setting Up Security
 - Stamping the Database
 - Testing the Database
 - Testing the Move to Production
 - Developing a Test Plan
 - Preserving Queries, Trees and Tree Structure
